Symphony in DeMeanor Time goes on

release date December 14 2009

Symphony in DeMeanor brings back the "the album" on this release. 10 tracks that flow together beautifully and will have you hearing different things on each listen. The songwriting, performance and production are all up to their usual high standard.

"Symphony in DeMeanor is reminiscent of Klaatu's sweetness but also it's respect for The Beatles," says Tom Harrison, Music Critic, The Vancouver Province.

Discography:

"The First One" (2004)

SiD-0001

"Symphony in DeMeanor gives psychedelic rock with lots of Jeff Lynne-type production and a smidgen of Pink Floyd "Dark Side of the Moon" influence... Symphony in DeMeanor reminds me of an updated Klaatu and that's not a bad thing"
Ear Candy Magazine

"The Second One" (2006)

SiD-0002

For their second album SiD have produced a clutch of songs to rival their excellent debut... You can hear snatches of bands ranging from the mid 60s right up to date... Every song has a catchy melody, superb playing, great vocals, and is what real rock music should be about"
